All Open Open
 Range From March 2021 To February 2022
 Select month Current Default Month - 0 Months

In order to get the effect of a rolling 12 months, and to only include completed months, the range must be entered manually.

This report includes multiple main sorts with subtotal levels for each.

While being very close to the built in Production Cross Reference report layout, adding in multiple subtotal levels requires the replacement of the very handy pre-totaled data fields with more traditional total fields.

S-Cross Reference Production Report
